

## Costs

Eliminate capital purchase, maintenance fees, costly upgrades - pay only for the software you need in one, predictable monthly payment.

1

## Scalability

The massive cloud computing and storage capacity means you can add users in seconds, as and when you need.

2

## Evergreen

Forget 'end of support' issues - cloud solutions are evergreen, with automatic updates and ensuring all users are on the same version.

3

4

## Flexibility

Break from the confines of the office - with cloud, your applications and services are accessible from everywhere, on any device.

# 8 reasons to move to the cloud >>

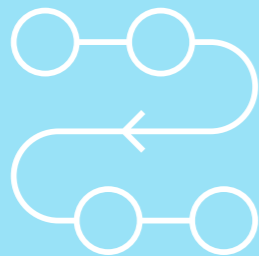

8

## Security

Cloud solutions provide more security than a single business can, with built-in protection, and the ability to layer additional services.

7

## Business continuity

Multiple data centres and availability zones ensure users have continued access, meaning lower downtime and increased productivity.

6

## Integration

Cloud enables collaboration and teamwork, with files in one place, and ability to intermix and combine functionality.

5

## Control

While users are free to work from anywhere, administrators gain control with central management, and eliminating the need for 'shadow IT'.
